

SIGN APPLICATION FOR PERMANENT SIGNS 2020 Zoning Development Permit (ZDP) (Revised 1/1/2020)

Project # _____ Fee: \$50.00 + Use Tax

Sign Type (Please check all that apply)

- Free Standing, Projecting, Wall, Mural, Canopy, Manual Changeable Copy, Electronic Message Display, Directory, Fuel Pricing, Signs Under Covered Walkways, Other _____

1. Applicant Information

- a. Applicant Name _____ b. Business Owner, Business Representative, Property Owner, Sign Contractor

2. Business Owner Information

- a. Name of Business _____ b. Name of Business Owner / Representative _____ c. Mailing Address _____ d. E-mail Address _____ e. Phone Numbers Business _____ Mobile _____

3. Property Owner Information

- a. CHECK HERE IF SAME AS #2 ABOVE (and skip to Number 4.) b. Name _____ Project Contact? Yes No c. Mailing Address _____ d. E-mail Address _____ e. Phone Numbers Business _____ Mobile _____

4. Contractor Information

NOTE: Some signs may require installation by a qualified contractor licensed with the Pikes Peak Regional Building Department (PPRBD) (either a Special Building 'D-5A' Sign Contractor or a Framing 'D' Contractor and specialty trades as warranted). Contractors/installers must also hold a City of Woodland Park Business License. Plan review and inspections by PPRBD may be required depending on project scope (such as free-standing signs over 7-feet in height). Call Woodland Park Planning & Building Department at 687-5202 to determine if a Building Permit is needed.

- a. Contractor Name _____ b. Company Name _____ c. Mailing Address _____ d. Field Phone # _____ E-Mail Address _____ e. Contractor License # _____ WP Business License # _____

5. Site Information

- a. Site Address _____
- b. Lot ____ Block ____ Subdivision _____
- c. Property Zoning _____

6. Sign Information

- 1. Estimated Sign Valuation (labor & materials) \$ _____
- 2. Size of Sign (length x height in feet) _____ ft x _____ ft Area _____ SF
- 3. Provide a Site Plan showing location of proposed sign in relation to other existing signs, the building and property lines.
- 4. Provide a sketch and site plan of the proposed sign showing dimensions (length, width, height), color and design.

7. Specific Sign Type Information

REQUIREMENT	SIGN TYPE (Fill in requirement to Column type)				
	Free Standing	Wall A	Wall B	Canopy	Multi-Family
Sign Height (feet)					
Length of Street Frontage (amount of property fronting the street on which the sign is located in linear feet)					
Size of Lot (in square feet)					
Size of Building Footprint (in square feet)					
Speed Limit (in front of sign location)					
Length of Wall (on which sign will be installed, in feet)					
Dimensions of Canopy (in linear feet)					
Number of Residential Units					

8. Certification

The City relies upon information found in this application. You are encouraged to obtain a proper survey and/or study to verify lot lines and other information. If you erect your sign within the required setbacks or in violation of this application or other zoning regulation provisions, you may be required to move or remove it. Failure to comply with all zoning requirements could result in the issuance of a citation.

 Applicant Signature _____ Date _____

 Property Owner Signature _____ Date _____
(Property owner signature is required at submittal in order to process.)

City Use Only

This application has been found to be in compliance with applicable City provisions and is approved. The applicant is authorized to proceed in accordance with all information found in the application as conditioned below.

By _____ Date _____

Title _____

Staff Analysis/Notes

Sign Design & Plan Guidelines

Purpose. The purpose of the following sign design guidelines is to promote a high level of quality and creativity in sign design in keeping with the aesthetic beauty, historic and mountain town character, and cultural identity of Woodland Park.

Applicability. The following guidelines are recommendations only and are not required.

- A. **Design Compatibility.** New signs should be compatible with the design, color, scale and building materials of the structure or site on which they are placed. Signs should not obscure architectural features and should be designed in a manner that provides an artistic accent or visual point of interest that enriches the building. The design and placement of signs on buildings with multiple tenants should be complementary in terms of materials.
- B. **Color.** Sign colors should contribute to the legibility and to the overall communicative effect of the sign. Substantial contrast should be provided between the background color and the letters/symbols that make up the sign. Garish or stark color combinations generally should be avoided. Dark backgrounds with light letters and symbols are read more quickly than dark letters on light backgrounds. White should rarely be used as a background color.
- C. **Materials.** Sign materials should be compatible with the architectural design of the building's façade and should contribute to the legibility of the sign. Carved or sandblasted wood, formed etched cast metal, high density pre-formed foam, or other similar new materials are encouraged. Raised borders and raised letters are encouraged.
- D. **Copy and Lettering Style.** Sign fonts should be selected to provide both clarity and artistic integrity. The number of lettering styles should be limited to increase legibility, and letters and words should be spaced appropriately. Symbols and logos are encouraged wherever appropriate as pictographic images usually register more quickly in viewers' minds than written messages.
- E. **Illumination.** External illumination of the sign is encouraged, as it produces a softer, warmer effect that is more inviting to viewers. The intensity of sign lighting should not exceed that which is necessary to illuminate and make legible a sign from the adjacent travel way. Internally illuminated signs should not have a white or ivory background.
